

## Science programmes of study: Key stages 1 and 2

National curriculum in England

## Science programmes of study

Working	Plants	Animals, including	Everyday	Seasonal changes
scientifically		humans	materials	_
During years 1 and 2, bupils will be taught to use the following bractical scientific methods, processes and skills through the reaching of the brogramme of study content:  I asking simple questions and recognising that they can be answered in different ways I observing closely, using simple equipment I performing simple rests	Identify and name a variety of common wild and garden plants, including deciduous and evergreen trees Identify and describe the basic structure of a variety of common flowering plants, including trees.	Identify and name a variety of common animals including fish, amphibians, reptiles, birds and mammals Identify and name a variety of common animals that are carnivores, herbivores and omnivores Describe and compare the structure of a variety of common animals (fish, amphibians, reptiles, birds and mammals, including pets) Identify, name, draw and label the basic parts of	Distinguish between an object and the material from which it is made Identify and name a variety of everyday materials, including wood, plastic, glass, metal, water, and rock Describe the simple physical properties of a variety of everyday materials  Compare and group together a variety of everyday materials on the basis of their simple physical properties.	Observe changes across the four seasons Observe and describe weather associated with the seasons and how day length varies.

identifying and	which part of the body is

observations and ideas			
to suggest answers to			
questions			
gathering and			
recording data to help in			
answering questions.			

Statutory requirements for Year 2: Pupils will be taught to:							
Working	Living things and	Animals, including	Plants	Uses of everyday			
scientifically	their habitats	humans		materials			
During years 1 and 2, pupils will be taught to use the following practical scientific methods, processes and skills through the teaching of the programme of study content:  asking simple questions and recognising that they can be answered in different ways  observing closely, using simple equipment performing simple tests	Explore and compare the differences between things that are living, dead, and things that have never been alive Identify that most living things live in habitats to which they are suited and describe how different habitats provide for the basic needs of different kinds of animals and plants, and how they depend on each other Identify and name a variety of plants and animals in their habitats, including micro-habitats Describe how animals	Notice that animals, including humans, have offspring which grow into adults Find out about and describe the basic needs of animals, including humans, for survival (water, food and air) Describe the importance for humans of exercise, eating the right amounts of different types of food, and hygiene.	Observe and describe how seeds and bulbs grow into mature plants Find out and describe how plants need water, light and a suitable temperature to grow and stay healthy.	Identify and compare the suitability of a variety of everyday materials, including wood, metal, plastic, glass, brick, rock, paper and cardboard for particular uses Find out how the shapes of solid objects made from some materials can be changed by squashing, bending, twisting and stretching.			

identifying and	obtain their food from		
classifying	plants and other animals,		
🛮 using their	using the idea of a simple		
observations and ideas	food chain, and identify		
to suggest answers to	and name different		
questions	sources of food.		
gathering and			
recording data to help in			
answering questions.			

Statutory requirements fo	Statutory requirements for Year 3: Pupils will be taught to:						
Working scientifically	Plants	Animals, including humans	Rocks	Light	Forces and magnets		
During years 3 and 4, pupils will be taught to use the following practical scientific methods, processes and skills asking relevant questions and using different types of scientific enquiries to answer them setting up simple practical enquiries, comparative and fair tests making systematic and careful observations and, where appropriate, taking accurate measurements using standard units, using a range of equipment, including thermometers and data loggers gathering, recording, classifying and presenting data in a variety of ways to help in answering questions recording findings using simple scientific language, drawings, labelled diagrams, keys, bar charts, and tables	Identify and describe the functions of different parts of flowering plants: roots, stem/trunk, leaves and flowers Explore the requirements of plants for life and growth (air, light, water, nutrients from soil, and room to grow) and how they vary from plant to plant Investigate the way in which water is transported within plants	Identify that animals, including humans, need the right types and amount of nutrition, and that they cannot make their own food; they get nutrition from what they eat Identify that humans and some other animals have skeletons and muscles for support, protection and movement.	Compare and group together different kinds of rocks on the basis of their appearance and simple physical properties Describe in simple terms how fossils are formed when things that have lived are trapped within rock Recognise that soils are made from rocks and organic matter.	Recognise that they need light in order to see things and that dark is the absence of light Notice that light is reflected from surfaces Recognise that light from the sun can be dangerous and that there are ways to protect their eyes Recognise that shadows are formed when the light from a light source is blocked by a solid object	Compare how things move on different surfaces Notice that some forces need contact between two objects, but magnetic forces can act at a distance Observe how magnets attract or repel each other and attract some materials and not others Compare and group together a variety of everyday materials on the basis of whether they are attracted to a magnet, and identify		

reporting on findings from enquiries, including oral and written explanations, displays or presentations of results and conclusions using results to draw simple conclusions, make predictions for new values, suggest improvements and raise further questions identifying differences, similarities or changes related to simple scientific ideas and processes using straightforward scientific evidence to answer questions or to support their findings.	Explore the part that flowers play in the life cycle of flowering plants, including pollination, seed formation and seed dispersal.			Find patterns in the way that the size of shadows change.	some magnetic materials Describe magnets as having two poles Predict whether two magnets will attract or repel each other, depending on which poles are facing.
---	---	--	--	---	---

Statutory requirements for	Statutory requirements for Year 4: Pupils will be taught to:							
Working scientifically	Living things and their	Animals, incl humans	States of matter	Sound	Electricity			
	habitats							
During years 3 and 4, pupils will be taught to use the following practical scientific methods, processes and skills  asking relevant questions and using different types of scientific enquiries to answer them setting up simple practical enquiries, comparative and fair tests making systematic and careful observations and, where appropriate, taking accurate measurements using standard units, using a range of equipment, including thermometers and data loggers gathering, recording, classifying and presenting data in a variety of ways to help in answering questions recording findings using simple scientific language, drawings, labelled diagrams, keys, bar charts, and tables	Recognise that living things can be grouped in a variety of ways Explore and use classification keys to help group, identify and name a variety of living things in their local and wider environment Recognise that environments can change and that this can sometimes pose dangers to living things.	Describe the simple functions of the basic parts of the digestive system in humans Identify the different types of teeth in humans and their simple functions Construct and interpret a variety of food chains, identifying producers, predators and prey.	Compare and group materials together, according to whether they are solids, liquids or gases Observe that some materials change state when they are heated or cooled, and measure or research the temperature at which this happens in degrees Celsius (°C) Identify the part played by evaporation and condensation in the water cycle and	Identify how sounds are made, associating some of them with something vibrating Recognise that vibrations from sounds travel through a medium to the ear Find patterns between the pitch of a sound and features of the object that produced it Find patterns between the volume of a sound and the strength of the	Identify common appliances that run on electricity Construct a simple series electrical circuit, identifying and naming its basic parts, including cells, wires, bulbs, switches and buzzers Identify whether or not a lamp will light in a simple series circuit, based on whether or not the lamp is part of a complete loop with a battery			

reporting on findings from enquiries,		associate the rate of	vibrations that	Recognise that a

Statutory requirements	for Year 5: Pupils	will be taught to:	1		T
Working	Living things	Animals, incl	Properties and	Earth and	Forces
scientifically	and their	humans	changes of	Space	
	habitats		materials		
During years 5 and 6, pupils will be taught to use the following practical scientific methods, processes and skills:    planning different types of scientific enquiries to answer questions, including recognising and controlling variables where necessary   taking measurements, using a range of scientific equipment, with increasing accuracy and precision, taking repeat readings when appropriate   recording data and results of increasing complexity using scientific diagrams and labels, classification keys, tables,	Describe the differences in the life cycles of a mammal, an amphibian, an insect and a bird Describe the life process of reproduction in some plants and animals.	Describe the changes as humans develop to old age.	Compare and group together everyday materials on the basis of their properties, including their hardness, solubility, transparency, conductivity (electrical and thermal), and response to magnets Know that some materials will dissolve in liquid to form a solution, and describe how to recover a substance from a solution  Use knowledge of solids, liquids and gases to decide how mixtures might be separated, including through filtering, sieving and evaporating	Describe the movement of the Earth, and other planets, relative to the Sun in the solar system Describe the movement of the Moon relative to the Earth Describe the Sun, Earth and Moon as approximately spherical bodies Use the idea of the Earth's rotation to explain day and night and the apparent	Explain that unsupported objects fall towards the Earth because of the force of gravity acting between the Earth and the falling object Identify the effects of air resistance, water resistance and friction, that act between moving surfaces Recognise that some mechanisms, including levers, pulleys and gears, allow a smaller
